Assignment 6

Name: Naveen Kumar Poonam   Student id: GR018898

Interviewer: Hi Naveen Good afternoon.

Me: Hello sir, it's a very good afternoon

Interviewer: We are supposed to connect at 1 pm right?

Me: Yes sir

Interviewer: Let me pull out your Profile, Briefly explain your profile where you are working currently and what is a day to day activities, what is the size of your team

Me: So, about my company. Right now, I am working in Wipro limited which is the most repetitive organization and it handled many types of government projects

So basically, it's a private company but its entire work is based on the government of India, and in my day-to-day activities as a Data analyst to analyze data I performed different activities like understanding the clients and solving different problems, and loading the data into ETL then after creating relations with different tables and Participated in requirements meetings and Scrum Calls to understands the Report Requirements. Created Microsoft Power BI Dashboards in Power BI Service using Reports. • Installed and Configured Data Gateways to Refresh and Schedule Refresh of the Dataset. • Managed access to Reports, Dashboards, and Data for individual users using roles. In our team, there are a14 people there, so it's, not a big one small team, right?

Interviewer: What is ETL?

Me: ETL Stands for Extract Transform and Load

ETL software extracts the data from any kind of OLTP (online transactional processing)

system and Transform the data as per our reporting needs and load the data into OLAP

(online analytical processing) system

Interviewer: Which language is used in Power Query?

Me: sir, M (Mashup) is the Language used in Power Query behind every GUI option to perform the ETL Activities.

Interviewer: What is a Transpose Table?

In a table rows will be converted into columns and columns will be converted into rows called Transpose columns.

Interviewer: What is drill down visual?

Me: To show all or complete information in a single visual that is called drill down visual

If you create a drill-down visual you need hierarchy, hierarchy means step by step

In the process, if you create a hierarchy you need related dimension columns then only

possible to create drill-down visual

Drill down visual actions

1) Drill up

2) Drill down

3) Next Level

4) Expand next level

Interviewer: what about exposure to SQL and ms excel

Me: So I have worked on SQL server and SQL as well as I have basic knowledge on Ms excel.

Interviewer: Apart from publishing reports on power bi service what else do you do?

Me: we do different activities like perform row level security and we perform export reports to share with clients.

Interviewer: Okey fine no issues, I will give my feedback to HR and he will connect with you okay?

Me: yes

Interviewer: Do you have any questions?

Me: No

Interviewer: Thanks naveen

Me: Thank you, sir
